- durable and rugged units – heating appliances based on granite have compared to other heating elements a significant long-lasting endurance
- saves more than 50% energy – proof: inspection report Nr. E-6-18250 ZIK
- after reaching its maximum temperature the front panel stores heat, resulting in enormous energy savings
- heating device stays warm and delivers heat after being switched off
- heats when, where and as much as you like (mobile and flexible)
- German technology
- perfect for allergy sufferer, asthmatics and rheumatics: air stays clean as on the surface neither dust nor hair is burning
- pleasant warmth – as by a cockle stove
- due to the aluminium foil which is put on the back of the unit by wall-mounting the entire warmth spreads into the room
- the cheapest central-heating for houses, flats, holiday homes, churches, halls and further objects
- opportunity to supervise nine heating units from one point

#### **FEATURES:**

- easy handling and start up: switch on and heat
- overheating protection: heating conductor inside
- simply plug into the electric socket
- possible warming up by a digital temperature control device from 0°C up to +40°C
- reaches fast desired temperature
- front panel heats up to 85°C, switches off by thermostat
- without noise and dust; neutral in exhalation
- no oxygen consumption, generating no smoke
- no maintenance costs
- protection class: II
- colours: see samples of granite
- material: natural elements
- 5 years guarantee
- easy start up
- horizontally or vertically wall-mounting possible (fastening material included in price)
- noiseless
- on-/off switch
